-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 5-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Miya et al (US 6,028,852).

#### **Claims 5, 7 and 9.**

Miya et al discloses a communication system and method, comprising a transmission apparatus for transmitting a signal at plural types of transmission rates, and a reception apparatus for receiving the transmitted signal, wherein:

the transmission apparatus comprises:

signal generation means (see Fig.1) for generating a signal (2,3,...,m) to be transmitted into which pilot symbols (known symbol) which are predetermined patterns have been inserted, such that a ratio that the pilot symbols appear in the signal becomes a value responsive to a transmission rate of the signal; and

transmission means (115) for transmitting the generated signal, and

the reception apparatus comprises:

reception means (see Fig.3) for receiving the transmitted signal; and

Art Unit: 2611

coherent detection means (314) for carrying out coherent detection by using the pilot symbols included in the received signal.

**Claims 6, 8 and 10.**

Since the pilot symbols are essentially overhead, it is quite established that the ratio of the pilot symbols to the signal is designed to be a substantially optimum value in consideration of both accuracy of coherent detection by using the pilot symbols and transmission efficiency of the signal.
